

Yyppee

Yyppee Quick Intro

"A brand-new marketing, advertising & communications platform specifically built and designed for the restaurant industry just came onto the market and we are the exclusive food distributor here in (Your State).

Everything about your restaurant that you want customers to know about is now available in 1 app.

If you can picture your Facebook or LinkedIn wall, separated with posts from friends and others as you scroll, then you can picture Yyppee's wall.

The only difference is that the Yyppee wall is filled with all the restaurants on their platform, and they're displayed using GPS, from closest to farthest from your customers current location.

And when you click on a restaurant, it takes you to that restaurant's page that displays everything you, the restaurant owner, could ever want to share with your customers.

There's nothing like this anywhere and there's so much more you can do with this app.

The price is also ridiculously low and there's no contracts to sign or commitments to make.

You've got to hear more about this. I'll tell you when we meet."
