

Yyppee

What Yyppee Does for Restaurant Owners

- Yyppee puts everything you want customers to know about your restaurant into one application.
- Yyppee makes it easier for you and your customers to communicate with each other.
- Everything you market to your customers goes right to their mobile device and alerts them when it arrives.
- Anything and everything you could want to market or offer to your customers about your restaurant is available on the Yyppee platform.
- Every communication you send out reaches your customer instantly.
- Yyppee is a flat fee monthly based subscription plan and takes no share of any of your revenue or profits like most other applications do.
- Yyppee is GPS based and alerts customers when they are near your restaurant.
- Yyppee markets many of your restaurants features automatically for you once they are set up.
- Yyppee is easy to use and simple to operate for everyone and it organizes everything for you.
- There are no contracts to sign and no commitments to make. Cancel whenever you want.
- Yyppee has great analytics that are updated in real time.
- Yyppee will save you money every month while motivating your customers to visit your restaurant more often.
- You no longer have to hope customers will think to remember your restaurant, search their emails, scroll through their social media sites, check their mailboxes, read the flyers you sent them, or anything else when they're hungry.
